Introduction
Module 4 Lesson 5

It is important to have some knowledge about the geography of the foreign country, its terrain features, traffic regulations and road signs. The ability to read a map belongs to this group as well. All maps are different, so it is imperative to examine in detail the map symbols and to know what relates to each symbol.

□□□□□□□□□□□□□□□□ *(Road Signs)*

Tip of the Day

You will be confused by the fact that buses, quite legally, often travel in the opposite direction to everybody else on one-way streets. International signs exist (not always in places where they can be seen), but many signs are only written in Thai. Ignorance of the law, or the plea that you do not read Thai is, of course, no excuse whatsoever. *Driving is on the left, most of the time!

Terrain Features
Thai SOLT I
Culture Notes
Module 4 Lesson 5

The most conspicuous features of Thailand's terrain are high mountains, a central plain, and an upland plateau. Mountains cover much of northern Thailand and extend along the Myanmar border down through the Malay Peninsula. The central plain is a lowland area drained by the Chao Phraya and its tributaries, the country's principal river system, which feeds into the delta at the head of the Bight of Bangkok. The Chao Phraya system drains about one-third of the nation's territory. In the northeastern part of the country the Khorat Plateau, a region of gently rolling low hills and shallow lakes, drains into the Mekong River through the Mae Nam Mun. The Mekong system empties into the South China Sea and includes a series of canals and dams. Together, the Chao Phraya and Mekong systems sustain Thailand's agricultural economy by supporting wet-rice cultivation and providing waterways for the transport of goods and people. In contrast, the distinguishing natural features of peninsular Thailand are long coastlines, offshore islands, and diminishing mangrove swamps.
